

OIL PATCH LOGISTICS ENVIRONMENTAL POLICY

Oil Patch Logistics recognises that it has a responsibility to the environment beyond legal and regulatory requirements. We are committed to reducing our environmental impact and continually improving our environmental performance as an integral part of our business strategy and operating methods. We will encourage customers, suppliers, and other stake holders to do the same.

We aim to:

- Comply with all relevant regulatory requirements and oil industry standards.
- Continually reduce and minimise environmental impacts.
- Consider environmental impacts of all our activities and incorporate environmental factors into business decisions.
- Involve employees in the implementation of this policy to increase commitment and improve performance.
- Ensure environmental management plans are in place before commencing any operational activities.
- Report all environmental related incidents and investigate and analyse them to prevent recurrence.
- Ensure our contractors have suitable environmental management systems in place prior to engaging their services.
- Continually improve and monitor our own, and our contractor's environmental performance.

The Managing Director is responsible for ensuring that this environmental policy is implemented, however, all employees have a responsibility to ensure that the aims and objectives of this policy are met.

Luke Myles

Managing Director

Oil Patch Logistics Ltd
